## Historic District Walking Tour

Towanda Borough was first settled in 1786 and was established as the county seat in 1816.

Nestled along a natural transportation route, the majestic Susquehanna River Valley, the town grew and prospered during the nineteenth century fueled at first by the coal industry and later the lumber industry.

Most of the 441 historic structures within the Towanda Historic District were built during this time. It has been said that the district contains the largest and most varied collection of period architecture in Bradford County.

The 50 structures featured in this brochure are further described by 20" x 20" bronzed plaques placed at their sites and are representative of the rest of the historic structures.

Please enjoy our historic walking tour as you visit the sites and learn more of their history and the lives that occupied them.

To learn more of our history and the town, you can visit [www.towandaborough.org](http://www.towandaborough.org).
